

## VASES & VESSELS

From the vibrancy of spring, to the texture of winter foliage – bringing a taste of nature into your interior deserves pride of place. Vases and vessels have always been a passionate part of the pulpo universe – from coloured glass reflections to textured ceramics, we have the perfect companion for your blossoming bouquet.

For the first time ever, all of the floral friendly members of the pulpo range have been brought together for a family photo; beautiful bouquets included. Demonstrating the experimental forms and material diversity of each vase and vessel in our catalogue, these objects have the right ingredients to perfectly display your greenery.

The smooth ceramic lines of the building series is ideal for those flowers with long thin stems, whereas the varied heights of mountains allows for an Ikebana approach to floral arranging.

The flowing silvered glass reflections of container may extend the life of your bouquet further into your interior; the monolithic matt ceramic forms of the fg vessels create a dramatic counterpoint to a soft bouquet.

While the iridescent ceramic glaze of the makeup range can match the vibrancy of the flowers above, the fat lava glaze of the maket vases hints at the earth in which all of these floral beauties sprouted forth.
